Parker, CO · Denver Metro

970-402-1256

Technology Leader · IT Operations, AI & Digital Transformation

asteiner@outlook.com

linkedin.com/in/andrewjsteiner

Technology leader with 12+ years building and modernizing IT for a multi-location, service-oriented business that scaled from \$350M to \$1.1B across 25 offices. Owns the full stack — cloud, cybersecurity, enterprise applications, networking, and end-user support — while leading an active AI-adoption and automation agenda that has replaced six-figure consulting engagements with tools built in-house. Denver-based and hands-on, with deep operational roots that turn technology into measurable business results.

AREAS OF FOCUS

AI Adoption & Governance

Automation

Cloud Infrastructure — Azure / M365

Cybersecurity & Disaster Recovery

Enterprise Applications

Multi-Site Operations

Vendor & Contract Management

Team Leadership & Development

EXPERIENCE

Director of Information Systems · Model 1 Commercial Vehicles

May 2018 – Present · Denver, CO (remote)

Lead all technology for a 550-employee, 25-location commercial vehicle sales, service, and rental/leasing business (~\$1.1B revenue). Report to executive leadership and present quarterly to the CEO, COO, CRO, President, and CFO.

- Own the company's AI strategy and governance — drove enterprise adoption and administration of Microsoft Copilot, ChatGPT Enterprise, and Claude Business, and authored the organization's AI governance and security policy and framework.
- Stay hands-on alongside the strategy: personally prototype solutions, then partner with the team to productionize and operate them — internal apps, integration middleware, and data tools (built with Claude and Claude Code) that deliver in days what once required six-figure consulting.
- Built the IT, ERP, and BI function from the ground up; today lead a 7-person team — 12 at peak, leaner now through automation — and a \$2.5M technology budget while supporting 300% business growth.
- Modernized and run the infrastructure across 25+ sites — migrated on-premise systems to Microsoft Azure (~20% cost reduction) and administer a multi-tenant Microsoft 365 environment; deployed a \$350K Cisco Meraki network (SD-WAN), cloud VoIP, mobile device management, and co-managed cloud physical security.
- Built a cybersecurity program from the ground up — NIST-aligned, with managed MDR / EDR / SIEM, Intune endpoint management, backup & DR, and security-awareness training — reducing high-risk users from 40% to under 10% with zero major incidents since.

- Led the enterprise DMS implementation — the company's core operational platform — across accounting, vehicle sales, parts, and service: configuration, data migration, testing, and cross-functional change management at 25+ locations. Also led 5 M&A technology integrations end to end.
- Built the company's data warehouse and lakehouse from scratch — engineering ETL/ELT pipelines that unified 15 source systems — and delivered layered executive and operational dashboards and reporting in Power BI and SSRS.
- Manage vendor relationships and contracts across the full technology stack — negotiating improved terms and bringing services in-house for 10%+ savings.

Service Systems Manager · Model 1 (Creative Bus Sales)

2016 – 2018 · Chino, CA

Built the service-operations systems and reporting that became the foundation for the company's enterprise IT function.

Operations Manager · Model 1 (Creative Bus Sales)

2014 – 2016 · Brooklyn, NY & Elkhart, IN

Managed multi-site operations and process improvement — the operational grounding behind a business-first approach to technology.

Production & Quality Control Manager · Landi Renzo USA

2011 – 2014 · Torrance, CA

Led production and quality control for alternative-fuel vehicle systems.

EDUCATION

B.S., Chemistry — Minor in Entrepreneurship

University of Southern California

Certificate in Organizational Leadership

Harvard Business School Online · 2023

TECHNICAL ENVIRONMENT
